SENIOR ENDPOINT PLATFORM ENGINEER

Lifecycle-Driven Enterprise Endpoint Architecture | Automation | Governance | Observability

Senior endpoint engineering leader with 15+ years in enterprise IT, specializing in scalable device lifecycle architecture across ConfigMgr, Intune, and Microsoft security ecosystems. Transitioning from execution-focused engineering to platform-level architectural design—emphasizing automation, resilience, telemetry-driven maturity and governance alignment.

Design philosophy. *Build once. Instrument everything. Automate relentlessly.*

PROFESSIONAL EXPERIENCE

Senior Endpoint Platform Engineer | 2022 – Present
Fortune 500 Enterprise Environment.

- Designed and implemented enterprise OSD observability framework (OSDMonitor.exe), introducing phase-aware telemetry and self-healing monitoring into task sequences.
- Engineered event-driven recovery model using scheduled task automation and process termination auditing to prevent client desps deployment failures.
- Built Azure Log Analytics ingestion pipeline and real-time Azure Workbooks to drive provisioning reliability ~ 25–30%.
- Architected hardware lifecycle governance framework integrating driver version control, BIOS auditing and compliance modeling.
- Automated HP driver acquisition via dynamic HTML parsing and SoftPaq resolution without CMSL cost.
- Eliminated manual packaging workflows & hardware vendor-imposed BIOS configuration costs.
- Standardized task sequences modularly and hardware abstraction layers to reduce configuration drift.

Impact: Shifted OS deployment from reactive troubleshooting to a measurable, reliability-engineered provisioning system.

SCCM / Intune Engineer | 2019 – 2022

- Managed enterprise co-management strategy (ConfigMgr & Intune)
- Engineered zero day patch automations,
- Governed Wier22 package lifecycle, governed Azure AD provisioning,
- Standardized Azure AD provisioning aligned with identity controls,

Impact: Shifted OS deployment from reactive troubleshooting to a reliable, engineer provisioning system.

Senior Systems Engineer | 2017 – 2018

- Managed enterprise documentation and performance metric frameworks,
- Developed PowerShell automation solutions, reduce manual operational effort.

CORE COMPETENCIES

- Endpoint Platform Architecture
- ConfigMgr (SCCM/MECM)
- Intune & Co Management
- Autopilot (Foundational)
- Conditional Access / Drvice Logic
- Microsoft Defender for Endpoint (Thraat Expesure Modeling)
- Azure Log Analytics & Workbooks
- PowerShell Automation
- Driver & Firmware Lifecycle Governance
- Deployment Telemetry Engineering
- Platform Observability Design
- Enterprise Change Governance

CERTIFICATIONS

AZ-305 Microsoft Certified;
Azure Solutions Architect Expert

AZ-104 Microsoft Certified;
Azure Administrator Associate

AZ-900 Microsoft Certified;
Azure Fundamentals
